1. Pregnancies include live births, induced abortions, and reportable stillbirths (only those fetal deaths with a gestational period of 20+ weeks or which weigh 350+ grams are required to be reported under Idaho law).
2. Pregnancy rate: Number of pregnancies per 1,000 females in corresponding age group. Rates for <15 age group are based on females aged 10-14. In 2003, Idaho received additional abortion records from Montana for Idaho resident induced abortions occurring in Montana. In 2006, Idaho received additional stillbirth records from Utah and Washington for Idaho resident stillbirths occurring in these states. Data bases from 1998-2004 have been revised to include these records in pregnancy numbers and shown on this table. Data may differ from previous publications due to updates in the data base, revisions in population estimates, and standardization of file cutoff dates.
